BELMONT HILLS COUNTRY CLUB
GREENS COMMITTEE UPDATE
APRIL 1st, 2017

I wanted to take a moment to update our membership on a few things that are going on at Belmont Hills Country Club surrounding the golf course. The extremely warm weather in February this year allowed for Nick and his staff to begin working on the renovation of the bunker on hole #5 (see pictures below). Once Nick and his staff are finished with the bunker on #5, he will begin the renovation of the bunker on the right side of #4 green. Both bunker renovations were desperately needed as the face of the bunkers were washing away.

HOLE #5 BUNKER RENOVATION

Another very exciting project that we are actively working on is the renovation of our driving range. Through generous donations of labor and equipment we are able to complete this project with very little cost to our club. Our intention is to completely remove the middle two teeing grounds on the driving range to make one large teeing area. Bent grass will be planted and irrigation will be installed to ensure proper treatment of this area. The driving range is currently closed to allow for the work on this project, however we do anticipate opening the range the first week of April. Ron Baker will send an email to our membership once the range re-opens. The new teeing grounds on the range will likely open around June 1st, 2017 as it will take time for the new grass to grow.

DRIVING RANGE RENOVATION

The final project is the cleaning and rebuilding of our second water pump used to move water from our lake to the irrigation system on the golf course. We currently have two water pumps that operate this system and both must be in working condition to operate our irrigation system. In 2016, the first water pump was cleaned and rebuilt. This is no small task as the pumps are located below the level of the lake and a crane is needed to remove them so they can be transported to Boardman Ohio for service. We are very fortunate that the second pump lasted as long as it did because the pictures below show that it likely wouldn't have lasted much longer. The total cost of this project for pump #2 will be approximately $14,000.
